***Remarks***

1. U.S. Patent Nos. 5,279,982 (Crotti) and 5,631,179 (Sung et al.) are pertinent to applicant's disclosure, however, Claims 20-39 are allowable over the references of record because of the following reasons:

*Regarding Claims 20-26:*

These claims are allowable primarily because the inclusion therein, in combination as claimed in Claim 20, of the limitation of the third insulating layer being in physical contact with the side walls of the conductive film and the first insulating film.

*Regarding Claims 27-29 and 33-39:*

These claims are allowable primarily because the references of record, singly or in combination, cannot anticipate or render obvious the specific combination of process steps for forming a transistor with a capacitor above a bit line.

*Regarding Claims 30, 31, and 32:*

These claims are allowable primarily because the references of record, singly or in combination, cannot anticipate or render obvious the limitations for forming a contact hole in the first and second insulating films using the line/space pattern and the first and second conductive films as a mask, wherein the line/space patterns are perpendicular to the conductive films with at least the second insulating film being formed between the line/space patterns and the conductive films.
